Profile

Computer science student (Software Systems) and junior developer with hands-on experience building web applications on both frontend and backend (Spring Boot, React, Angular), in testing and in IT infrastructure. I solve technical problems on my own, pick up new tools quickly and see tasks through until the application works reliably. Years in customer service taught me to explain things clearly to non-technical people.

Work Experience

PMLOGY s.r.o. 04/2025 – present
Junior Software Developer (contract)

- Developing and extending web applications (frontend and backend), building new features and fixing bugs.
- Projects: booking platform, Vizitkomat, Screenomat.cz.
- Testing with Playwright, automated smoke tests and manual checks.
- Working independently on assigned tasks and owning their correctness.
- Using AI tools in development and carefully reviewing everything they produce.

MOJEMOBILKA s.r.o. 08/2023 – 01/2025
Sales and Customer Service

- Advising customers, selling phones and accessories, diagnosing and repairing devices.
- Handling warranty claims and returns, working with the POS and inventory system.
- Training new colleagues.

HUISMAN KONSTRUKCE s.r.o. 10/2021 – 12/2021
IT Support (short-term)

- Installing and configuring server infrastructure, assembling a server rack.
- Preparing and installing employee workstations.

Selected Projects

Bachelor's thesis: Loss Landscapes in Neural Networks GitHub | PyTorch Lightning, Hydra, Optuna, W&B
Loss-landscape analysis of 100 CNNs (FashionMNIST) differing in seed and optimizer: 2D/3D surfaces, interpolation between models, loss barriers, prediction disagreement; validation accuracy about 91.9 %.

D&D Campaign Manager GitHub | Spring Boot, React, MySQL, Docker
Web app for running RPG sessions: characters, spells, NPCs, bestiary, quests and combat state; JWT, REST API.

Ghost Stories VR GitHub | Unity 6, C#, OpenXR
VR horror game where the player banishes an enemy with a flashlight (raycast-based).

Svět bájí slovanských Unity
Game about Slavic mythology, built for an art-school student's bachelor's thesis.

Skills

Programming: Java, TypeScript, JavaScript, Python, C#, Kotlin, SQL

Backend: Spring Boot (Security, JPA), JWT, REST APIs, Node.js, PostgreSQL, MySQL, Firebase

Frontend: React, Angular, Vue.js, Next.js, Tailwind CSS, HTML, CSS

Testing and tools: Playwright, manual and automated testing, Git, Docker, Linux, networking (NAS, NAT)

Machine learning: PyTorch, PyTorch Lightning, Hydra, Optuna, Weights & Biases

Education

University of Ostrava – Faculty of Science 2023 – present
Bachelor's degree: Applied Informatics – Software Systems (finishing thesis)

Secondary School of Information Technologies, Frýdek-Místek 2019 – 2023
Computer Networks, Maturita (school-leaving exam)

Courses and Languages

Cisco Networking Academy: CCNA 1, CCNA 3, Network Security, Internet of Things, Linux

Languages: Czech (native), English (advanced), Korean (A1)
